From the Education Oversight Board:

Through these School Report Cards, the Office of Accountability brings to parents and public schools patrons a host of measures that chronicle the setting, operations and performance of Oklahoma's public schools. One significant measure is performance on tests from the Oklahoma School Testing Program. Under the program's current format, high school students are tested as they complete instruction in U.S. History, English II, Algebra I, and Biology I. By testing at the end of instruction, students are provided the best opportunity to demonstrate their understanding of the course work.

Most of the courses with End-of-Instruction Tests are taken by students in 9th or 10th grade, however, the age and grade level of the student is not absolute and will vary based upon an individual student's scheduling of courses and a district's offering of courses. For example, a number of districts across the state offer Algebra I to advanced students in the 8th grade while other districts in the state only offer Algebra I to high school students.

When reviewing a high school's performance on the End-of-Instruction Tests, please remember and consider that there may be additional End-of-Instruction Test results posted on either a Middle School or Junior High School report card.

In addition to End-of-Instruction Test results there is a wealth of other performance measures included on this report card. Examine the participation and performance of students in Career-Tech programs. Consider what percentage of students took college prep course work and what was their average score on the ACT college entrance exam. Also review the performance of this school's graduates once they were in college and what percentage continued on to receive a college degree.

As an involved parent or patron I urge you to weigh the information on student performance and determine for yourself the quality of the education being provided. Compare your school's report card with that of other schools. Where your school is strong, acknowledge the good work. Where the school is weak, work with staff to improve it. Become a partner to education at your local school and within the district.

Sincerely,

Don McCorkell, Chairman
